COPY MAILED

SEP 04 2008

Applicant: Saltero, et al.  
Appl. No.: 10/590,282  
International Filing Date: March 24, 2005  
Title: METHOD FOR ADMINISTERING MEDICATIONS TO SUBJECTS WITH  
SWALLOWING DIFFICULTIES AND DISORDERS  
Attorney Docket No.: 025333-003.003  
Pub. No.: 2007/0196495 A1  
Pub. Date: August 23, 2007

This is a decision on the request for corrected of patent application publication under 37 CFR 1.221(b), received on September 20, 2007, for the above-identified application.

The request is dismissed.

Applicant requests that the application be republished because the patent application publication contains material errors, wherein the publication was published with two figures that do not belong in the application and the correspondence address is incorrect.

37 CFR 1.221 (b) is applicable "only when the Office makes a **material mistake** which is apparent from Office records.... Any request for a corrected publication or revised patent application publication other than provided as provided in paragraph (a) of this section must be filed within two months from the date of the patent application publication. This period is not extendable." A material mistake must affect the public's ability to appreciate the technical disclosure of the patent application publication, to determine the scope of the patent application publication, or to determine the scope of the provisional rights that an applicant may seek to enforce upon issuance of a patent.<sup>1</sup>

The instant request does not identify a material mistake in the publication made by the Office under 37 CFR 1.221(b) with respect to drawings and the correspondence address. The inclusion of two drawings and an improper correspondence address does not affect the public's ability to appreciate the technical disclosure of the patent application publication, determine the scope of the patent application publication, or determine the scope of the provisional rights that an applicant may seek to enforce upon issuance of a patent.

---

<sup>1</sup>Changes to Implement Eighteen-Month Publication of Patent Applications, 65 FR 57023, 57038 (Sept. 20, 2000), 1239, Off. Gaz. Pat. Office Notices 63, 75 (Oct. 10, 2000) (final rule).

It would greatly benefit the Office if **applicant did not provide copies of papers**, which were previously submitted or a **complete copy of the pre-grant publication**, as it unnecessarily increases the cost to the Office. See 37 CFR 1.4(b). A request for corrected publication need only point out what was printed incorrectly in the application, where the error occurs in the publication and where the correct text or drawing is found in the application papers. Marked up relevant copies of the applications papers and the pre-grant publication may facilitate processing of the request, where it is not readily apparent where the error occurs. If it is not clear why the error is a material error, further explanation may be warranted.

The papers including drawings, which were improperly scanned into this application and published has been removed from the application.

Applicant is advised that a "request for republication of an application previously published" may be filed under 37 CFR 1.221(a). Such a request for republication "must include a copy of the application in compliance with the Office electronic filing system requirements and be accompanied by the publication fee set forth in § 1.18(d) and the processing fee set forth in § 1.17(i)." If the request for republication does not comply with the electronic filing system requirements, the republication will not take place and the publication fee set forth in § 1.18(d) will be refunded. The processing fee will be retained.

Any request for republication under 37 CFR 1.221(a) must be submitted via the EFS system as a "Pre-Grant Publication" and any questions or request for reconsideration of the decision should be addressed as follows:
